

Autonomous Sail Boat for Water Quality Monitoring

Conventional Water Monitoring Methods limited in reach a high cost and Time Consuming.

So ASWQM can save time, money and lifes by an Accurate and Real Time Monitoring.

- Monitoring Quality of Water.
- Boat for holding water sensors and for Making Monitoring Easier.

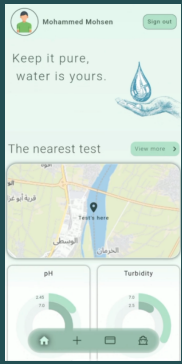

- Mobile Application to Display Water Quality and Control Boat.

About Us

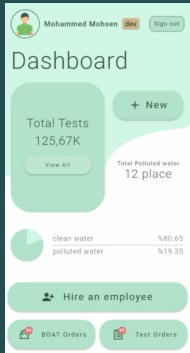

We are a team of 5 Computer Engineering Students of Helwan Enineering.

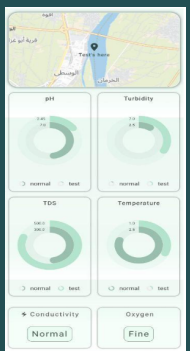

Customer can detect Water Location to Monitor in GPS Map by Just one Click.

Boat is connected to Mobile Application so that it gets orders.

Both Customers and Employees can use our application to classify whether the water is drinkable or not.

Our Boat holds water sensors: ph, turbidity, tds, Disolved Solids,..etc.

Water data is Displayed Compared to water quality standard.
